

INCIDENT REPORT:

MP-15379-Intro: Install a Virtual Machine and Guest OS

Date:11-29-2022

Conclusion:

What I did and what did I learn:

Downloaded VirtualBox, Kali Linux os, watched video provided by my Live Project Instructor Alex Sanderson "[How To Install Kali Linux in VirtualBox \(2022\) | Kali Linux 2022.1](#)". I worked through the setup and actually tried three different operating systems.

How I will use this knowledge during the Live Project:

This will be used for offensive stories during the Live Project.
